Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated problem statement allows you and your team to understand the customer's challenge and identify a suitable solution.

Problem Statement (PS-1)

I am (Customer)	An employee requesting a standard laptop through the organization's IT procurement process.
I'm trying to	Request and receive a suitable standard laptop quickly through a simple ordering process.
But	The laptop ordering process can involve manual requests, repeated information entry and multiple approval steps.
Because	There is no single streamlined process for standard laptop selection, approval and order tracking.
Which makes me feel	Uncertain about the status of my request and concerned about delays in receiving the required laptop.

Problem focus: Simplify and automate standard laptop ordering so that requests, approvals and order status can be handled through a streamlined procurement process.
