

Empathy Map

Date	30 September 2026
Team ID	MKU201LaptopOrders
Project Name	Streamlining IT Procurement – Automating Standard Laptop Orders
College	Cardamom Planters' Association College.
Team Members	P. Nivetha; S. Sarika Sri; V. Ragavi
Maximum Marks	4 Marks

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I need a standard laptop for my work.” • “I want the ordering process to be simple.” • “I need to know the status of my request.”	THINKS • “Which laptop should I select?” • “How long will the approval and delivery take?” • “I hope I do not have to enter the same details repeatedly.”
DOES • Submits a laptop request. • Provides required details and waits for approval. • Checks or follows up on the order status.	FEELS • Frustrated by a manual or lengthy process. • Uncertain when the request status is unclear. • Relieved when the order process is quick and transparent.

PERSONA NAME Standard Laptop Requester (Role / User Type) Employee / Laptop Requester
