Standard Laptop Order – Employee / Requester Journey

Customer action	Submit standard laptop request	Review request / approval	Track generated task	Configure / prepare laptop	Receive completion / status
System touchpoint	Service Catalog	Request + Approver	Create Catalog Task	Hardware assignment	Task state / update
Customer need	Easy, clear order form	Quick decision	Visible task creation	Correct configuration	Completed laptop
Automation opportunity	Capture request data	Route approval	Auto-create task	Notify / assign	Update status
Potential pain point	Manual request errors	Approval delay	Task duplication	Configuration delay	Lack of status visibility

Evidence reflected from the provided screens

- Service Catalog is shown as the flow trigger.
- The flow contains a “Create Catalog Task” action.
- The request contains a Standard Laptop item, quantity 1, and a displayed price of \$1,100.00.
- The generated catalog task is associated with the Hardware assignment group and a laptop configuration description.
- The catalog task screen shows Approval = Approved and State = Open.
