

1. Problem–Solution Fit

Streamlining IT Procurement Automation – Standard Laptop

Project Title	Streamlining IT Procurement Automation – Standard Laptop	Team ID	MKU201 Laptop orders
Date	30.09.2026	Platform	ServiceNow / Flow Designer

Problem Statement

Standard laptop requests require several ServiceNow records and fulfillment steps. Without a clearly automated flow, a request can remain open while a catalog task must be created, assigned and tracked separately. The project addresses this process by connecting the Service Catalog request directly to an automated fulfillment task.

<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Current pain point' 'frags': [ParaFrag(__tag__='b', bold=1, fontName='Helvetica-Bold', fontSize=8.7, greek=0, italic=0, link=[], rise=0, text='Current pain point', textColor=Color(14902, 196078, 219608, 1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>	<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Observed evidence' 'frags': [ParaFrag(__tag__='b', bold=1, fontName='Helvetica-Bold', fontSize=8.7, greek=0, italic=0, link=[], rise=0, text='Observed evidence', textColor=Color(14902, 196078, 219608, 1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>	<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Business / user impact' 'frags': [ParaFrag(__tag__='b', bold=1, fontName='Helvetica-Bold', fontSize=8.7, greek=0, italic=0, link=[], rise=0, text='Business / user impact', textColor=Color(14902, 196078, 219608, 1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>
Manual or disconnected task creation	Flow Designer currently contains a Service Catalog trigger and a “Create Catalog Task” action.	Extra coordination and risk of missed fulfillment steps.
Limited assignment visibility	Catalog Task shows an empty Assigned to field while Assignment group is Hardware.	Ownership can be unclear until the task is picked up.
Request-to-task traceability needs consistency	Request → RITM → Catalog Task records are visible in the screenshots.	Users and support teams need a predictable audit trail.
Status remains open during fulfillment	The Catalog Task screenshot shows Approval = Approved and State = Open.	Completion depends on the fulfillment task being progressed and closed.

Target Users and Need

Requester / Employee	IT Hardware Team	ServiceNow Administrator
Submit a standard laptop request and receive creation and state	Receive and state catalog task with the right	Request can be state, assignable group

Solution Fit

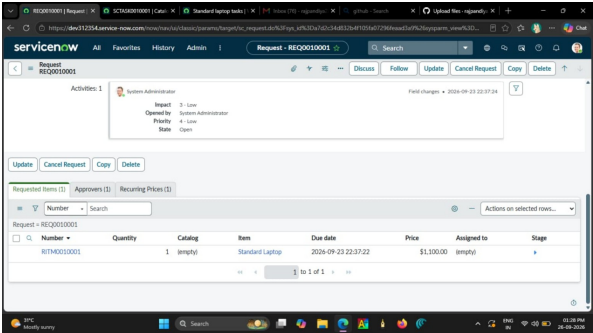

- **Trigger:** A Service Catalog request for the Standard Laptop item starts the automation.
- **Automation:** Flow Designer creates the corresponding Catalog Task from the Requested Item record.
- **Fulfillment:** The task is routed to the Hardware assignment group for configuration / fulfillment.
- **Traceability:** Request, RITM and Catalog Task remain linked through ServiceNow records.
- **Control:** An error-handler area is available in the flow for future exception actions.

Success Indicators

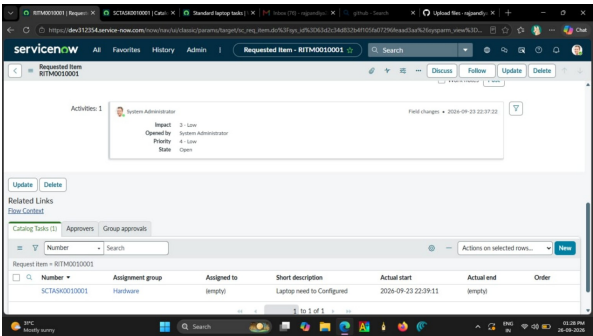

1	Every eligible Standard Laptop request creates a catalog task automatically.
---	--

2	The created task retains the request/RITM context and required fulfillment description.
3	Hardware is the intended assignment group for the standard laptop fulfillment task.
4	The task can be tracked from Open through completion, providing a consistent audit trail.

Project Evidence

ServiceNow Request: Standard Laptop item and price shown.

Requested Item: linked Catalog Task and Hardware assignment group.
