

3. Solution Architecture

ServiceNow architecture for Standard Laptop procurement automation

Project Title	Streamlining IT Procurement Automation – Standard Laptop	Team ID	MKU201 Laptop orders
Date	30.09.2026	Platform	ServiceNow / Flow Designer

Architecture Flow

Exception path: Flow Error Handler → logging / notification / retry / escalation (as configured)

Architecture Components and Data Flow

Layer	Component	Responsibility
Request	Service Catalog	Captures the Standard Laptop request from the requester.
Transaction	REQ / RITM	Stores the request and Requested Item context.
Orchestration	Flow Designer	Listens for the catalog event and controls the automation sequence.
Fulfillment	Catalog Task (SCTASK)	Creates and tracks the laptop configuration work.
Operations	Hardware assignment group	Performs laptop configuration / fulfillment and updates the task.
Control	Error Handler	Provides a controlled path for handling flow failures.

Observed ServiceNow Configuration

- The Flow Designer screen shows the flow named “Standard laptop tasks”, with a Service Catalog trigger and a Create Catalog Task action.
- The Requested Item screen shows a linked Catalog Task with Hardware as the assignment group and the short description “Laptop need to Configured”.
- The Request screen shows the Standard Laptop item under the Requested Items list.
- The Catalog Task screen shows Approval = Approved and State = Open, providing a concrete fulfillment state to automate and track.

Recommended Extension Points

- Populate Assigned to automatically from the Hardware group's routing rules where appropriate.
